Product Description

Netizen Dream Curtain Electric Intelligent Vertical Blind Curtain Vertical Curtain Living Room Balcony Study

advantage:High appearance value, can adjust light freely at 180 degrees, and the material used is a combination of cloth and yarn, taking into account the drapery of the cloth curtain and the function of adjusting light and shadow of the blinds.

There are four details to pay attention to when selecting and installing:

Firstly, the Dream Curtain is a single piece installed on the track one by one, with dimensions of ten centimeters and twelve centimeters. It is recommended to choose a ten centimeter one for better results.

Secondly, the tracks used for the Dream Curtain are different from traditional curtains. The tracks used are for both dynamic and electric models, and can also be controlled by intelligent voice.

Thirdly, it is recommended to make curtain boxes for better results. The size of the curtain box is recommended to be over 20 centimeters, and for curtain boxes with lights, it is recommended to make them over 25 centimeters. With the addition of soul lighting, the effect will be better.
